Replacement Pump Parts & Service

Pumps

"Drop in" replacement pumps and rotating assemblies directly interchangeable with existing FAIRBANKS MORSE & ALLIS CHALMERS installations.

Modern day pump designs adapted to fit special, old or obsolete applications. No piping or base modifications.

Rotating assemblies to fit existing volutes and casings. No piping or base disturbances.

Conversions to other drive arrangements such as:

- Dry pit submersible
- Close-coupled
- Direct drive - no coupling
- New technology drive shafts

Cost effective alternatives to major repairs or rebuilds.

Manufacturing replacement pumps
and parts since 1985.

Replacement Pump Parts & Service

Solutions

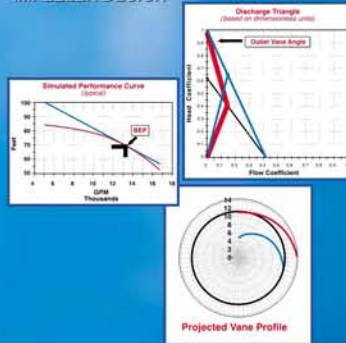

We are water and wastewater pump professionals with over 100 years combined experience in pump application, operation, service, maintenance, and manufacturing.

CONVERSIONS

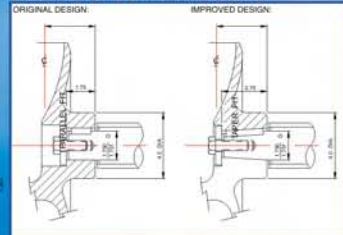

Modernization of old or obsolete models with current design parts and assemblies.

IMPELLER DESIGN

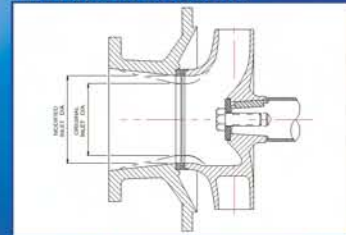

Computer generated impeller design and redesign to solve specific application and performance problems.

MECHANICAL IMPROVEMENTS

Design upgrades and modifications to improve reliability and extend the operating life of your pump installations.

HYDRAULIC IMPROVEMENTS

Solutions to noise, vibration, poor performance, corrosion, erosion, cavitation, extended downtime, high maintenance and repair costs.

Our expertise can save you money on pump maintenance and repairs. We invite you to bring us your pump problems!
